## **News From Stephen Meade**

**Seoul, Korea**

**Tuesday, March 6<sup>th</sup>, 2018**

### **MonetaPro.IO Takes 3<sup>rd</sup> Place at d10e in Seoul, Korea**

MonetaPro.IO took 3<sup>rd</sup> place at d10e in Seoul over the weekend. D10e is the largest and leading Blockchain Conference company in the world with 26 events this year alone. This past weekend in Seoul, Korea, D10e featured the World's largest ICO Contest with 32 companies presenting. MonetaPro continued to place in the top 3 after last month's 1<sup>st</sup> place finish in Silicon Valley.

"It is quite the validation that the judging panel took into account a wide variety of criteria when assessing all competitors. It also provides additional evidence that investors seek well-rounded blockchain opportunities. Our CEO, Stephen Meade, impressively pulled together an intelligent mix of a talented team, workable model, and liquidity opportunity that makes up MonetaPro." said Robert Jacobson, Director of Token Relations at MonetaPro.

MonetaPro.IO is a closed-loop payment system for Global Non-Cash Trading. Today, there is a \$17 trillion dollar existing industry of global non-cash trading. The average business trade is over \$1M. However, this corporate bartering takes place manually via phone, email or fax. MonetaPro solves automation by creating a GBUC (General Business Usage Credit) that enables one-to-many exchange. MonetaPro intends to be the most progressive financial transaction engine in the marketplace.
